Projects

Online Library

Online Library Management System is a system that maintains the information about the books present in the library, their authors, the members of the library to whom books are issued, library staff, and all. This is very difficult to organize manually. Maintenance of all this information manually is a very complex task. Owing to the advancement of technology, the organization of an Online library becomes much simple. Online Library Management has been designed to computerize and automate the operations performed over the information about the members, book issues and returns, and all other operations.

E-commerce(Uniq-Cart Website)

E-Commerce(electronic commerce) is the activity of electronically buying or selling products on online services or over the Internet E-Commerce draws on technologies such as mobile commerce, electronic funds transfer, supply chain management, Internet marketing, online transaction processing, electronic data interchange(ED), inventory management systems, and automated data systems. E-commerce is turn driven by the technological advances of the semiconductor industry sector of the electronics industry.
